Présentation ETP

Sunday 28th of January 2024

Médiathèque Faculté de Médecine Lyon

8h30-13h00 **Hydrocephalus and Shunts: Myth and reality**

8h30 Round table 1. Adjustments of valve setting? How clinically effective?

Chair: C. Mottolese, M Schuhmann

8h30 M Messing Juenger: Radiological slit ventricles (without Slit Ventricle Syndrome). When to worry and how to manage.

8h40 B Pettorini: Is valve adjustment effective in treating Slit Ventricle Syndrome? Is there an age limit?

8h50 Discussion: M Choux, U Thomale

9h10 Accidental changes of valve setting. How to prevent it?

Chair: T Roujeau, L Massimi

9h10 A Szathmari: Surgeon point of view

9h20 Ass Tête en l'air: Patient's association point of view

9h30 The companies' point of view

9h30 Integra/Codman

9h40 Medtronic

9h50 Miethke

10h00 Sophysa

10h10 Discussion: C Mottolese, B Pettorini

10h30 Break and visit of stands

11h00 Round table 2. Prophylactic surgery of the shunt: when and what protocol?

Chair: L Riffaud, M Messing Juenger

11h00 M Schuhmann: What to do when a valve is disconnected on a routine examination in an asymptomatic child?

11h10 B Pettorini: What to do when a valve setting is blocked in an asymptomatic child?

- 11h20 L Massimi What do to when the distal catheter seems too short in an asymptomatic child?
- 11h30 U Thomale Is there a place for prophylactic systematic adjustment of valve setting in asymptomatic neonates and toddlers?
- 11h40 Discussion C Di Rocco, A Szathmari

12h00 Round table 3. Shunt removal myth or reality? When and how

Chair: E Gimbert, A Chivet

- 12h00 M Messing Juenger When to consider shunt removal possible
- 12h10 Ass Tête en l'air The patient's point of view
- 12h20 PA Beuriat Protocols for shunt removal
- 12h30 B Pettorini Results of shunt removal attempts
- 12h40 M Vinchon How to anticipate these" situations: implications on initial shunt
- 12h50 Discussion : M Messing Juenger, F Di Rocco

13h00 End of the 9th Journées Lyonnaises de Neurochirurgie pédiatrique
